PROFESSIONAL SUMMARY

Computer Engineering undergraduate with hands-on experience in software development, AI, and full-stack web technologies. Developed AI-powered applications in computer vision and NLP, along with scalable MERN stack solutions for real-world use cases. Proficient in React.js, Node.js, Python, TensorFlow, and MongoDB, with a strong interest in building reliable, user-focused software.

EDUCATION

Anjuman-I-Islam's Kalsekar Technical Campus (AIKTC), University of Mumbai
Bachelor of Engineering in Computer Engineering – CGPI: 9.1/10

Mumbai, India
2023 – 2027

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, C, C++
Frameworks & Libraries: React.js, Node.js, Express.js, Flask, Tailwind CSS, Bootstrap
Machine Learning: TensorFlow, Scikit-learn, OpenCV, CNN, BERT, NLP, OCR, Computer Vision
Databases: MongoDB, MySQL
Developer Tools: Git, GitHub, Postman, Render, Vercel

EXPERIENCE

SEO & SEM Engineer Intern
VITHUB

Aug 2025 – Nov 2025
India

- Conducted keyword research, on-page SEO, and competitor analysis to improve website visibility and search performance.
- Assisted in planning and optimizing Google Ads campaigns to increase online reach and user engagement.
- Analyzed website performance using analytics tools and recommended optimization strategies
- Collaborated with cross-functional teams to enhance digital marketing performance

PROJECTS

Fake News & Hate Speech Detection | *Python, TensorFlow, BERT, OpenCV, OCR, NLP, Flask* | [GitHub](#)

- Developed an AI-powered system to detect fake news and hate speech from text, images, videos, and YouTube URLs
- Integrated OCR and NLP techniques to extract and classify textual information from multimedia content
- Built a multimodal machine learning pipeline for automated content analysis and prediction

SafeScan AI – Food & Cosmetic Ingredient Detection | *Python, TensorFlow, CNN, OpenCV, OCR, Flask* | [GitHub](#)

- Built an AI-based system to identify harmful ingredients, allergens, and adulterants from food and cosmetic labels
- Applied OCR and computer vision techniques to extract ingredient information from product packaging
- Generated AI-driven health recommendations based on detected ingredients

QPASS – Smart Bus Pass Management System | *Node.js, Express.js, MongoDB, EJS* | [Live](#) | [GitHub](#)

- Developed a QR-based digital bus pass management system with secure authentication and role-based dashboards
- Implemented document verification, session management, and QR code validation for efficient pass issuance
- Integrated a payment gateway to enable secure online bus pass payments
- Designed an admin approval workflow to streamline application processing

CERTIFICATIONS

Supervised Machine Learning: Regression and Classification – DeepLearning.AI & Stanford University (Coursera)
Fundamentals of Machine Learning and Artificial Intelligence – AWS Training & Certification
SEO & SEM Internship Certificate – VITHUB
